

## Chat connect

### 1.Introduction

#### Overcome:

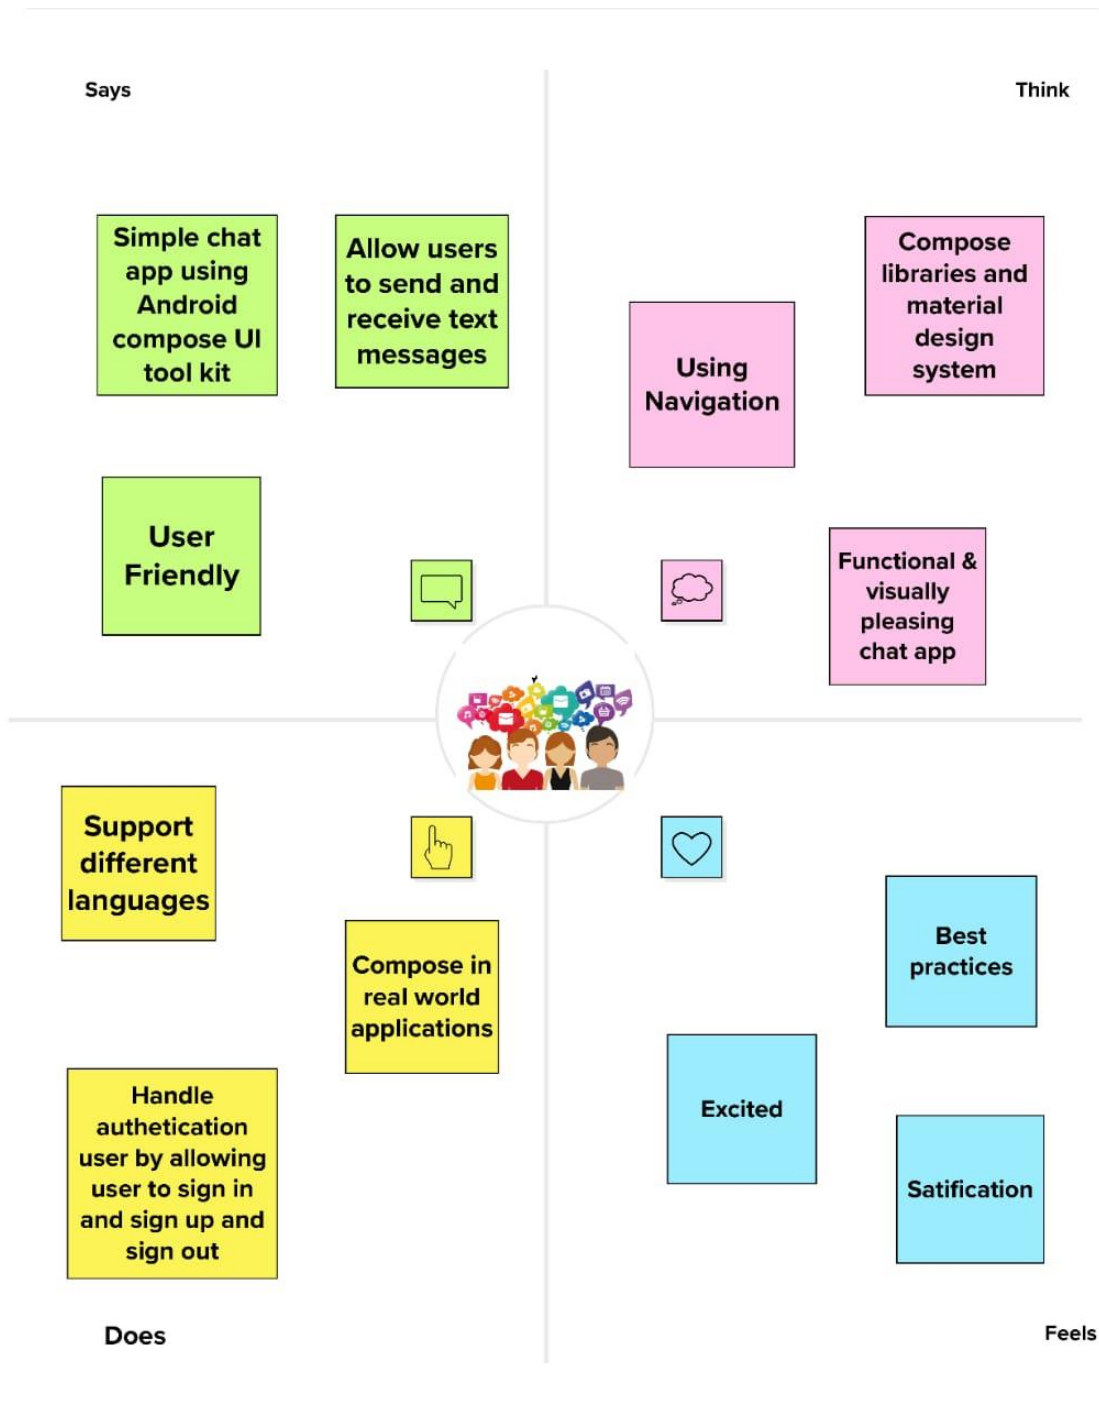

**Chat Connect is a sample project built using the Android Compose UI toolkit. It demonstrates how to create a simple chat app using the Compose libraries. The app allows users to send and receive text messages. The project showcases the use of Composes declarative UI and state management capabilities. It also includes examples of how to handle input and navigation using composable functions and how to use data from a firebase to populate the UI.**

#### Purpose:

**A chat application makes it easy to communicate with people anywhere in the world by sending and receiving messages in real time. With a web or mobile chat app, users are able to receive the same engaging and lively interactions through custom messaging features, just as they would in person.**

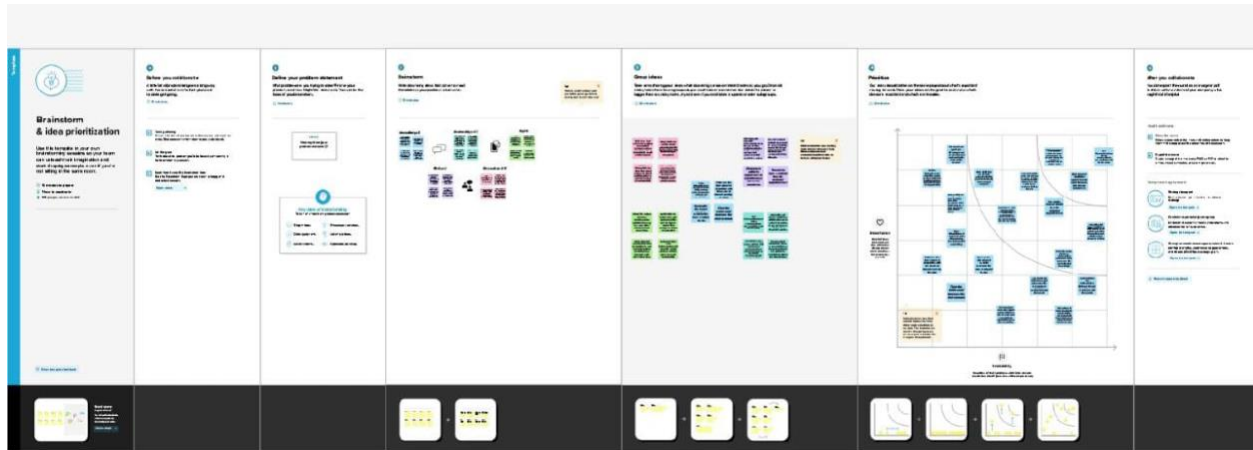

## 2.Problem definition & design thinking

### I) Empathy map

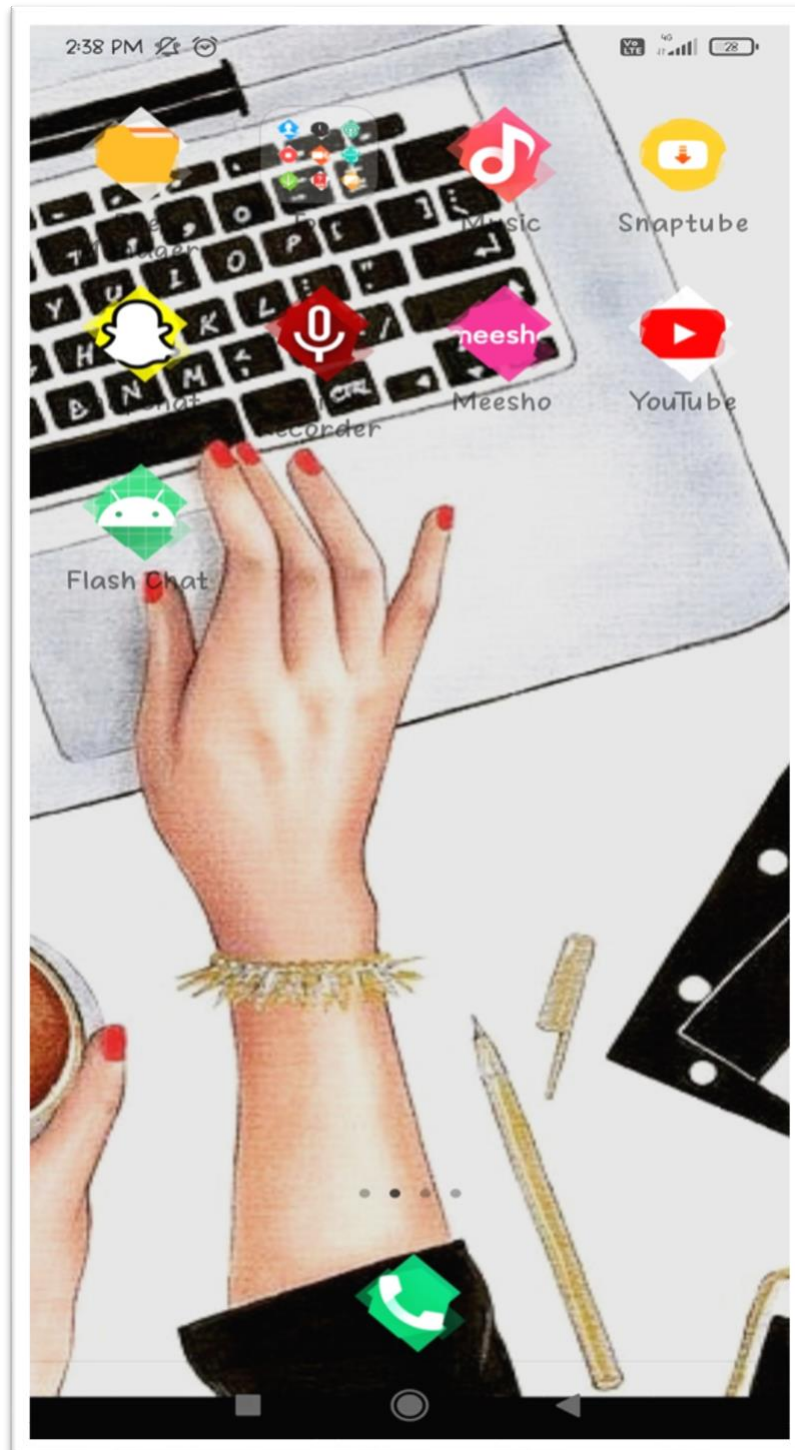

## II) Brainstorm & ideation
